

## VENTILATORS | DESCRIPTION

CP Millieu ventilators are specially designed to deliver a large volume of air at a very high level of pressure. The demand for a high pressure is needed when pipes with dimension between Ø50 - Ø80 mm are used.

Ventilating medicin cabinets, suction arms, or special adapters for other equipment often demands a high level of pressure.

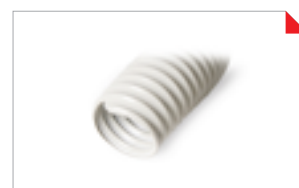

The ventilators are mounted in an insulated noise reduced cabinet which reduces the noise from the ventilator to an acceptable level.

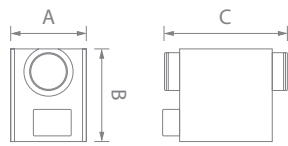

The ventilators cover the demand from 1 to 8 suction arms, but please do not hesitate to contact us for further assistance.

## VENTILATORS | FEATURES

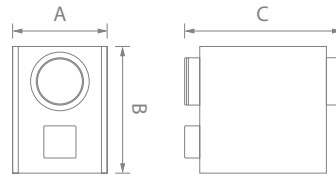

Features of the CP ventilators include:

- ✓ High volume
- ✓ High pressure
- ✓ Low noise
- ✓ Slim dimensions

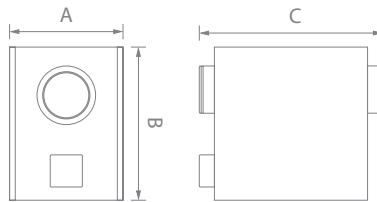

CP 608

CP 610

CP 621
