

## SEPARATION TANKS | DESCRIPTION

A separation tank is not just a tank - at least not before you have tried the Rectus separation tanks!

The Rectus separation tanks are known in the business for long lasting quality products. The tanks are designed to fulfill the demand for a simple solution. The materials are suitable for the rough environment in a suction system. This has been proved for many years of reliability!

Our assortment consists of 5 different separation tanks:

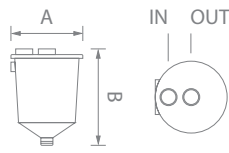

- 4 liters tank - which is perfect for a small clinic with 1 unit.
- 15 liters tank - a bigger size which suits clinics with 1-2 units.
- 25 liters tank - a very popular model that is reliable and economic in use. Suits for 2-4 units.
- 50 liters tank - the largest model in our assortment and it fits up to a clinic with 4-6 units.
- Sep-It separation tank - see page ST 02.
